soft pastels

With subtle pastel shades, such as delicate rose, light foggy blue or frosted sage, **CITY VELVET** provides an incomparable, almost poetic softness and harmony to sophisticated interiors. The discreet, soft colour scheme combines perfectly with the gentle, slightly shimmering surface of our classic to create a refined atmosphere full of elegance and calm. This slight touch of luxury bathes the room in a fine light.

More vibrant tones such as delicate pistachio green or powdered peach, set off by an elegant off-white, bring some lightness and a sporty spirit into play. They have an inspiring, invigorating effect, giving the modern setting a sense of space and inviting you to slow down.

timeless naturals

In natural, timeless shades, **CITY VELVET** embodies discreet luxury and the unique beauty of nature. The subtle colours are inspired by the warmth of sand, the earthy depth of wood and the cool clarity of stone, and combine with the soft texture of our velvet to create a harmonious atmosphere of sophistication and elegant restraint. Light off-white shades appear gentle and inviting. Rich chocolate brown develops a fascinating shimmer and joins elegant metal tones such as antique gold, bronze or warm copper to radiate pure savoir-vivre.
